

SECUIDEA_ERP_Server.Controllers.api.
Visit.VisitController.EmployeeByName

```
graph LR; A[SECUIDEA_ERP_Server.Controllers.api.Visit.VisitController.EmployeeByName] --> B[SECUIDEA_ERP_Server.Models.ResultModels.BoolResultModel.Success]; B --> C[SECUIDEA_ERP_Server.Models.ResultModels.BoolResultModel.BoolResultModel];
```

The diagram illustrates the return type of the `EmployeeByName` action in the `VisitController` of the `api` namespace. It shows a sequence of three boxes connected by blue arrows. The first box (shaded gray) contains the controller and action name. The second box contains the return type `ResultModels.BoolResultModel.Success`. The third box contains the full return type `ResultModels.BoolResultModel.BoolResultModel`.
