

SECUIDEA_ERP_Server.Program.Main

SECUIDEA_ERP_Server.Controllers.api.
Parking.IParkingController.Setup

SECUIDEA_ERP_Server.Program.
SetupApiContainer

```
graph LR; A[SECUIDEA_ERP_Server.Program.Main] --> C[SECUIDEA_ERP_Server.Program.SetupApiContainer]; B[SECUIDEA_ERP_Server.Controllers.api.Parking.IParkingController.Setup] --> C;
```

The diagram illustrates a dependency or call flow. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'SECUIDEA_ERP_Server.Program.Main'. The bottom box contains the text 'SECUIDEA_ERP_Server.Controllers.api.Parking.IParkingController.Setup'. On the right, there is a single gray rectangular box with a black border containing the text 'SECUIDEA_ERP_Server.Program.SetupApiContainer'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both the Main program and the API controller's Setup method interact with or call the SetupApiContainer method.
